

Transport Optimization

What it is

- The Transport Optimization App is a great tool to assign shipments to available vehicles in an optimal way.
- Very powerful optimization engine to optimize fleet utilization and regard many operative constraints.

What it delivers

- Optimal fulfillment plan for a given number of orders.
- Detailed modeling capabilities like pickup and delivery time windows for shipments, detailed vehicle costs and capacity profiles etc.

What are the benefits

- Save costs and time through optimal fleet utilization.
- Simulate demand changes and make best decisions regarding your transport plans.
- Decide if it makes sense to fulfill shipments by your own vehicles or by external service providers.
