

Last Mile

What it is

- The Last Mile App is a great tool to optimize the delivery routes on the last mile to the customer.
- It optimizes the sequence of the route stops, regarding operative constraints like tolls, highways, ferries, and travel mode.

What it delivers

- Get optimized last mile routes with detailed stop information.
- Get impressive animated map visualizations on street level.

What are the benefits

- Profit from an operative route optimization directly in Excel.
- Save time and money by optimizing your last mile routes.
- Make your transport plans as accurate as possible by selecting between different travel modes.
