

Inventory Simulation

What it is

- The Inventory Simulation App is a great tool to simulate different inventory policies.
- Define demand, lead time, initial inventory and set the parameter ranges you want to simulate for your product/SKU.

What it delivers

- Determine the optimal inventory policy through simulation in multiple what-if scenarios in terms of service levels achieved.
- No-risk way to test inventory policy changes in a safe environment.

What are the benefits

- Save money through avoiding too much inventory or stock-outs.
- Meet customer service expectations through tuning inventory parameters.
- Interactive dashboard to analyze and share results with colleagues and customers.
